LegalEase

1. Brainstorming & Ideation Phase

AI-Powered Legal Document Generator

Objective

Define the LegalEase problem, target users, core idea, and initial solution direction.

Project Idea

LegalEase is an AI-powered legal document generator designed to simplify creation of customizable, accurate, editable legal documents such as employment contracts, lease agreements, NDAs, and other agreements.

Problem Statements

- People without a legal background may find legal document creation complex and time-consuming.
- Users need structured legal-document templates that can be customized using their own parties, dates, and terms.
- Users need editable previews and convenient export to TXT, DOCX, and PDF.
- Professional formatting, branding, logos, fonts, headers, footers, and terms tables should be supported.

Target Users & Scenarios

- Startup founder creating an employment contract for a new hire.
- Freelancer creating an NDA for a potential client.
- Landlord creating a residential lease agreement.

Empathy / User Needs

- Simple data entry without requiring legal expertise.
- Clear generated content and editable preview.
- Professional-looking documents that can be downloaded and shared.
- Secure handling of sensitive information.

Initial Feature Ideas

- AI-powered legal document generation.
- Document-type selection.
- Inputs for parties, terms and effective dates.

- Editable document preview.
- TXT, DOCX and PDF export.
- Logo and branding support.
